For China the cold war with America began decades ago, but most Americans are only just starting to realize that the Chinese Communist Party is opposed to American and it's values.

RealClearPolitics - 2020 - Latest Polls

The most important light-absorbing substance in the oceans is chlorophyll, which phytoplankton use to produce carbon by photosynthesis. Due to this green pigment - chlorophyll - phytoplankton preferentially absorb the red and blue portions of the light spectrum (for photosynthesis) and reflect green light.
