system (OBS). As both distro are rpm based, it's very easy for me to suport both. Getting the correct wx release built and installed is a pain as notonly you need to get the right version built, but you also need to compile it with the right option set (no stl) and then make ...

Fedora [OpenCPN Manuals]

One option how to install, remove or upgrade an application or group of applications is to use the command line and DNF (Dandified Yum) in Fedora 22 or later versions, or YUM (Yellowdog Update Manager) in Fedora 21 and earlier versions. This can be a much faster process than other interface, but requires the user to use the command line.
