This idea is called lean production, lean manufacturing, lean methodologies, lean enterprise, or even just “Lean.”. Lean often refers to improving manufacturing processes’ efficiency, but Lean is more than that. Its philosophy is about eliminating waste in all forms to make a process or business the best it can be.

### **Lean Production: Reducing Waste to Increase Productivity ...**

In most cases, lean process improvement emphasizes not only the prevention of waste but the elimination of existing waste. Rather than adding processes, or trying to manage existing processes, you have to first reduce waste. That means targeting time, labor and materials that are not being used effectively or are wasted.
