The propositional logic, as the first known NP-complete problem [Coo71], is used for representing many types of co-NP-complete and NP-complete combinatorial search problems. Such problems are prevalent in artificial intelligence as a part of decision-making, problem-solving, planning, and other hard problems.

Propositional Logic and Its Applications in Artificial ...

Actually propositional logic (or propositional calculus or even preposition logic) is a symbolic logic for manipulating propositions. The word calculus has to do nothing with calculus invented by Newton and Leibnitz. Calculus is a latin word, meaning a little store used for calculus.
