Read PDF The Technology Of Extrusion Cooking 1st Edition

Extrusion cooking is an ideal method for manufacturing a number of food products from snacks and breakfast cereals to baby foods. However, as a complex multivariate process it requires careful control if product quality is to be maintained.

Extrusion Cooking - 1st Edition

Read PDF The Technology Of Extrusion Cooking 1st Edition

Extrusion cooking involves high-temperature-short-time (HTST) process which reduces microbial contamination and inactivates enzymes. The main method of preservation of both hot- and cold-extruded foods is by the low water activity of the product (0.1-0.4), and for semi-moist products in particular, by the packaging materials that are used.
